POST-SHOW Q&A: with producer/director Anne Troake and dancer/executive producer Bill Coleman.

A pair of mammals moves through a boreal forest. Species: human. In a stereoscopic vision both intimate and monumental, filmmaker **Anne Troake** has created an arresting experiment in 3D cinema, drawing from a lively tradition of *in situ* art practice while recalling the rich history of nude and landscape artwork. Her collaborators are two extraordinary performers: **Carol Prieur** and **Bill Coleman**.
